

BIKELINER.com ^{Made in Germany}®
by LAU - Fahrzeugbau

The holidays of today are active:
To be on a journey with your own bicycle!
Your bus operator has the perfect
trailer for that: the **BIKELINER**®

- Bicycles and electric bicycles are transported - **SAFELY**
- You start your bicycle trip - **FAST**
- Loading is - **GENTLE** - for the bicycles
- **ECONOMICAL** - the expenditure of time when loading

Actually quite simply and yet so much **BETTER**
for you as bicycle rider:
The **BIKELINER**®-loading system by LAU Fahrzeugbau.

Bicycle trailers for busses: since 1989

FREE-standing bicycles - the **BIKELINER**® - loading system works so simply

All bicycles stand freely on their own tyres.

Each one is fixed safely in an own rail and with only one strap on a holder made of rubber or foam pad. Ready.

Heavy, high and the especially bulky, long electric bicycles and pedelecs do not have to be lifted (if yes, there are lifters available). They are simply wheeled into the lower loading rails. That spares the energy of the bus drivers and additionally protects from damage during loading.

Due to the diagonal array of the loading rails, 36, 40 or 44 bicycles may be completely loaded and secured within less than 30 minutes. No handlebars, how amply dimensioned they may be, will be turned or adjusted.

Right to your joy because thus the bicycles are protected.

Adjusting of mounting parts and handlebars, dismantling and attaching and adjusting again in the morning - that was yesterday. Because thanks to the **BIKELINER**® - loading system, you will also be the first one on the road.

A 44- **BIKELINER**® will be unloaded (and the bicycles are directly ready to go) within 15 minutes only as well. A real surplus for your holidays. Every day and every tour.

That is the way the loading system in **BIKELINER**® is like:
FAST, SAFE, GENTLE and handles your vacation
time ECONOMICALLY!

The best thing in the end:

Your bus operator has the suitable trailer. So there
is nothing in the way anymore of your activity holiday! :)
